DETAILED ACTION

1. Applicant's Amendment filed 04/10/2006 and including drawings, which have been approved, has been reviewed and placed of record in the file.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

3. This application is in condition for allowance except for the presence of claims 3 and 11-20 to an invention non-elected with traverse in Paper filed 11/01/2005. However, the traversal has not been found persuasive and the election has been treated as an election without traverse (MPEP § 818.03(a)). Accordingly, claims 3 and 11-20 have been cancelled.

Specifically, independent claims 3 and 20 are directed to an invention that is independent or distinct from the invention originally elected and now found patentable for the following reasons: each of the independent claims do not, for example, contain the limitation "loop-shaped gate electrode region arranged to surround a part of the device region and at least one device isolation region".
